 Addis Ababa

### SKILLS

Programming: C++, JAVA, PYTHON  
Framework: Laravel, React Js, tailwind Css  
Databases: MYSQL, Sqlite  
Version Control Systems: Git

### EDUCATION

#### Computer Science

##### Jimma University

2019-2024

Bachelor of Science in Computer Science  
Jimma University, Jimma, Ethiopia  
Graduated

Basic Electrical Electronics

##### Jimma Polytechnic College

2021-2024

Diploma in Basic Electrical Electronics  
and Equipment. Jimma Polytechnic  
College, Jimma, Ethiopia

### LANGUAGES

Oromic   
Amharic   
English

### PROFILE

Dedicated and detail-oriented Full Stack Developer with a robust background in leveraging programming languages and frameworks to create efficient and user-friendly web applications. Proven expertise in back-end development using Laravel and proficient in front-end technologies like React. Skilled in data management, user authentication, and integrating databases for streamlined operations. Committed to continuous learning and applying innovative approaches in technology.

### PROJECTS

#### Developer

Jimma Institute of Technology 2022-2024

- Developed and maintained web applications using the Laravel PHP framework for back-end processes, ensuring data management, secure message processing, and user authentication.
- Integrated MySQL databases for efficient storage and retrieval of user data, enhancing application performance by 30%.
- Collaborated with cross-functional teams to define and implement new features, ensuring alignment with business objectives.

#### E-commerce Website:

- An e-commerce website was created consisting of all functionalities that help the user to check order and products. Accomplishments include an intelligent UI/UX, and fast product searching optimized back end, and mobile-first responsive design smoothens the overall online shopping experience. The site has the functionality for user login, product listing, shopping cart and admin panel.

#### Hotel Booking System:

- The design of the hotel booking code system is the design of a login system that is very secure. This will allow users to search for the hotel, book it and view the booking history. The hotel booking system is a good database schema that will help in the better management of customer booking, hotel, and availability.

#### Job Portal System:

- The job portal was created to connect the job seekers with the job providers by offering job posting, searching as well as applying. It uses advanced filtering and job matching algorithms to offer job opportunities based on a user's profile, skills, and preferences.

#### Website Developed:

- a personal portfolio website using HTML, CSS, and JavaScript showcasing web development skills, enhancing personal branding and web presence. Skills Utilized: HTML, CSS, JavaScript.

### Certifications and Awards

- Full Stack Web Development Certification, Udemy
- Introduction to Artificial Intelligence Certification, Coursera
- Git, GitHub and React JS Development Certification, Udemy
- IT Essentials Certification, CISCO
- Basics of Android Development Certification, Udacity
